

StyleMart General Garment Care Instructions

GENERAL GARMENT CARE INSTRUCTIONS

COTTON T-SHIRTS AND CASUAL TOPS

Machine wash cold with like colors. Tumble dry low or hang to dry. Iron on medium heat if needed. Avoid bleach on colored items.

DENIM AND JEANS

Turn inside out before washing. Machine wash cold. Hang to dry to preserve fit and color. Wash infrequently (every 4-5 wears) to maintain shape and reduce fading.

SYNTHETIC FABRICS (POLYESTER, NYLON, SPANDEX)

Machine wash cold on gentle cycle. Tumble dry low or hang to dry. Do not iron at high temperatures — synthetics melt. Avoid fabric softener with moisture-wicking garments.

OUTERWEAR AND COATS

Check care label — some outerwear requires professional cleaning. Water-resistant coats should not be dry-cleaned as it removes the DWR coating. Re-apply DWR spray after every 5 washes.

LEATHER AND FAUX LEATHER

Wipe clean with a damp cloth. Apply leather conditioner every 3-6 months. Store on padded hangers in a cool, dry place. Never machine wash or dry clean real leather.

COLOR PRESERVATION

Wash dark colors in cold water inside-out. Use color-safe detergent. Avoid overloading the washing machine. Remove items promptly after wash cycle ends to prevent dye transfer.

STAIN TREATMENT

Treat stains immediately — blot, don't rub. Use cold water for protein-based stains (blood, sweat). Use warm water for oil-based stains. Test stain remover on an inconspicuous area first.
