

StyleMart Wool & Delicate Fabric Care Guide

WOOL & DELICATE FABRIC CARE GUIDE

WOOL-BLEND JACKETS AND BLAZERS

Wool-blend jackets (containing 50% or more wool) can be machine-washed on a cold/delicate cycle (30C or below). Use a mesh laundry bag to prevent snagging. Tumble dry on low heat for no more than 10 minutes, then reshape while damp and lay flat to finish drying. Do not wring or twist. Steam or low

PURE WOOL ITEMS

Items labeled 100% wool should be dry-cleaned or hand-washed only. If hand-washing: use cold water with a wool-specific detergent, soak for 5 minutes maximum, gently press water out (never wring), roll in a towel to absorb moisture, then lay flat to dry away from direct heat or sunlight.

CASHMERE

Cashmere items must be hand-washed in cold water with a cashmere-specific cleanser. Lay flat to dry on a clean towel. Do not hang cashmere items as they will stretch. Fold for storage; never use hangers. Pilling is normal for the first few wears — use a cashmere comb to remove.

SILK

Silk items should be hand-washed in cold water or dry-cleaned. Do not use bleach or fabric softener. Iron on low heat while slightly damp, using a pressing cloth between iron and fabric.

LINEN

Linen can be machine-washed on a gentle cycle with cold or lukewarm water. Linen wrinkles naturally — embrace it or iron while damp on medium-high heat. Do not tumble dry; hang or lay flat to air dry.
